Admissions 2019 - B.Tech CSE *with Specialization in Big Data*

To,

The Future Technology Leader

Dear Engineering Aspirant,

At the onset, let us take the opportunity to congratulate you on your success in Class 12 boards. The seeds of your goal planted with hardwork of you and your parents, that you have watered with your sweat has started bearing fruits. Now is the time to keep the momentum going, now is the time for making a career move, that can torpedo your career towards definite success, now is the **TIME to CHOOSE MVN**.

We have crafted the most advanced B.Tech CSE Curriculum, developed across three years, with input guidance from eminent academicians and industry experts. We believe that no Computer Science Engineering Course is complete without adequate exposure to programming and that is reflected in **Programming Track** in our course with Seven Programming papers in progressive succession based on **Java** and its Applications starting from Basics and going upto Application development in **Android**. This track not only adds expertise in programming, but also inculcates aptitude towards problem solving using CSE. To cater to diverse programming fields, the curriculum also adds on independent courses in **Web development** and **Python** to assist in Machine learning courses.

A parallel **Technology Track** has been developed to equip our technology graduate with contemporary and future technical skills needed for easy employability. This track draws heavily from technologies of tomorrow and comprises the most advanced courses on **NoSQL** databases including mongoDB AND Neo4J, **Big data** - hadoop, hive, spark and social media analytics, **Artificial Intelligence and Machine Learning**, and a new age paradigms with a course on **Cloud computing** as well.

These dual specialization tracks ensure that our technology graduate with top skills and up-to-date technological advancement is the first choice amongst his/her contemporaries for that coveted IT job.

The guiding philosophy, as an academician over 17 years of my professional career has been - *"Don't consider yourself merely as a faculty teaching students, think of yourself as a parent responsible for his child, and you shall leave no stone unturned to ensure their growth and success".* The mantra has not only produced astounding results in my academic career, but has also blessed me with students who became Friends for Life.

We are a community of lifelong learners, responsible global citizens, and champions of our own success , Join US

Sincerely,

Dr. Sachin Gupta
(For and On the Behalf of Team CSE, MVN University)
